# Amazing DESTINATIONS

## MALAYSIA

Good for visitors of all ages!

*The best cities to visit are...*

- **Kuala Lumpur**, it is the capital city of Malaysia. It has become one of the most visited cities in the world. Kuala Lumpur is a city that has grown into a metropolis where the tallest and most modern skyscrapers from Southeast Asia KLCC also stand side by side with ancient temples, mosques, many places to visit, hotels, restaurants, shopping malls and parks.
- **Kota Kinabalu**, the city Kota Kinabalu offers various attractions for its visitors. In the city you can find a wide range of accommodation options. The town offers beautiful views of the Crocker Range, which also houses the highest mountain called Mount Kinabalu. Kota Kinabalu has grown rapidly in recent years into a vibrant city. There are several modern shopping centres of which Asia City Complex, Suria Sabah and Borneo are the most popular. Also this city has several food courts, where you can eat delicious local dishes on the street.

*Special dish to try when you are there...*

**Nasi kerabu:** This famous Malaysian rice dish is distinct for its blue rice, which is served with fried chicken, egg, and fried keropok. A delectable dish that I strongly recommend to you.

*Landmarks of Malaysia:*

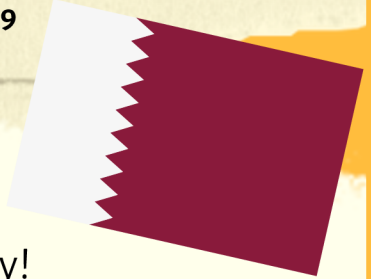

- **Mount Kinabalu**
- **Poring Hot Springs**

Article by Lam Tsz Tung, Teddy 6D09

## QATAR

World's richest country!

*Landmarks of Qatar:*

- **National Museum of Qatar**
- **Zubara Fort**
- **Souq Waqif**

*The best cities to visit are...*

- **Doha:** the capital of Qatar, people can visit the famous Museum of Islamic Art
- **Lusail:** visit the wonderful Lusail Stadium and look at the the stunning view of Marina Promenade
- **Al Khor:** have a relaxing ride on a small boat and take a break from the busy city

*Special dish to try when you are there...*

**Machboos:** it's the number 1 most famous food served in Qatar which is a rice-based dish and it is usually fried with seafood and meat with rose water

Article by Lam Tsz Tung, Teddy 6D09

# FRANCE

France is full of beautiful views which make people over the moon with happiness!

*The best cities to visit are...*

- **Paris** because the desserts there are so scrumptious and the food is excellent.
- **Nice** because the most famous thing there is ice cream.
- **Bordeaux** to visit its most famous building, Cite du Vin, which was built on May 31, 2016.

*Special dish to try when you are there...*

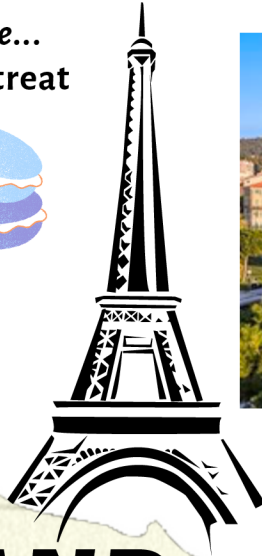

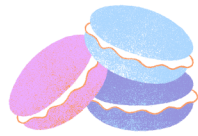

Macaron in Paris, a yummy sweet treat

*Landmarks of France:*

Eiffel Tower

Louvre Museum

Colline du Chateau (Nice)

Article by Chin Ching, Cassi 4D05

# SWITZERLAND

Switzerland is located in the heart of Europe. The temperature is nearly always negative and can make you freeze. Skiing is the most popular sport in Switzerland. Do you want to try?

*The best cities to visit are...*

- **Zurich** is the financial capital of Switzerland, famous for its luxurious shopping, dining, and entertainment. Take a step in there and hook up to the whole new experience. It will be fascinating. Enjoy their biking trails, sumptuous dining, and breathtaking views.
- **Chur** is the oldest city in Switzerland, with plenty of hiking and trekking trails. I suggest this city for all hikers. You can also enjoy your meal in some old but fancy restaurants.
- **Lucerne** has the world's oldest covered wooden bridge

*Special dish to try when you are there...*

Cheese fondue

Article by Liu Pak Hei,  
Jayden 4A16

## Mighty and Powerful Killer Whales

Many people know about dolphins, but who is the most prominent member of the dolphin family? It is... the orcinus orca, known as the killer whale!

Killer whales are enormous. They are black with some white patches near their eyes. They have a long tail and tiny teeth. They look adorable!

Although killer whales look cute to humans, they are the ocean's top predators. They hunt for fish, whales, stingrays and seals. Even sharks, which we think are powerful and fierce, lie in their stomachs. They consume about 86 kilograms of food every single day.

Killer whales are highly social and friendly animals. They live in groups and hunt for prey together. They are not generally considered dangerous to humans. Also, they produce little sounds to communicate with other killer whales and to catch their prey. They are very intelligent too. Some researchers have done research on the IQ of humans and killer whales and found that the IQ of Orcas is equivalent to that of fifteen or sixteen-year-old humans. They rank among the most intelligent species on the planet!

by Leung Hui Ching, Angie 6A15

## Sea Angels

Do you know which sea animal eats sea butterflies?  
What sea creature's feet grow like a pair of wings?

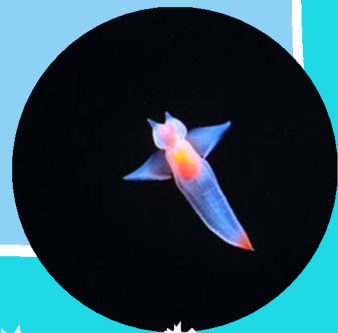

A sea angel is a type of swimming snail. The muscular foot found in land snails has evolved into a pair of wing-like structures called parapodia that are used for swimming in open water. Sea angels have small, transparent, gelatinous bodies and do not have a shell.

They live in deep sea of sub-sea ice polar regions like Arctic seas and also the North Atlantic. Sea angels have evolved in their behaviour and live in water columns.

### Fun Facts:

- The little horn like objects are actually sensory organs!
- The wing-like structures that they have called the parapodia are actually their feet.
- Because of its completely transparent body, we can see their heart, which is red.
- Sea angels are distant relatives of the garden snails you find in your backyard!

Article by Lo Hei Yan, Cyline 5C15

# DIVE IN!

## CREATURES OF THE SEA

## Beluga Whales

*What kind of whale doesn't have a dorsal fin?*  
Yep, the answer is the Beluga whale. They lack a dorsal fin, so they can swim swiftly under ice.

### Appearance

The Beluga whale is a member of the monodontidae family which consists only of two species of whales - the narwhal and the beluga whale. Beluga whales are all white and pudgy. If you are wondering why they are so plump, it's because most of its weight is blubber (subcutaneous fat). Blubber is a thick layer of fat directly under the skin of all marine mammals. It keeps them warm in the freezing water. Usually, males grow up to 5.5 m long and weigh up to 1,600 kg while females grow to an average of 3–4 m and weigh about 1,360 kg. Most beluga whales can live up to 90 years old.

### Diet

Beluga whales are carnivorous. That means they eat meat for the rest of their life. Beluga whales eat herring, capelin, smelt, cod, salmon, flatfish, sculpin, lingcod, eulachon, octopus, squid, shrimp, crab, clams, mussels, snails, and sand worms. Beluga whales are big eaters. They consume approximately 27 kilograms of food. And if you're wondering how much is 27 kilograms, well, you can feed about 600 people with 27 kilograms of spaghetti!

### Habitat and Behaviour

Belugas live in the waters of Alaska, Russia, Canada, and Greenland (The Arctic and The Subarctic). Belugas are often found in shallow coastal waters in the summer. Belugas make their >2,500 km migration from north of Alaska to the Canadian Beaufort Sea in the winter. They return to their birth place every summer to feed their offspring and reproduce. They are social animals so they hunt in a group. This helps them to hunt more prey and defend themselves from threat.

Article by Ho Shing Lam, Angie 6C09

## Dolphins

Dolphins are an animal that live at sea. Some people might mistake them as fishes but they are mammals just like us.

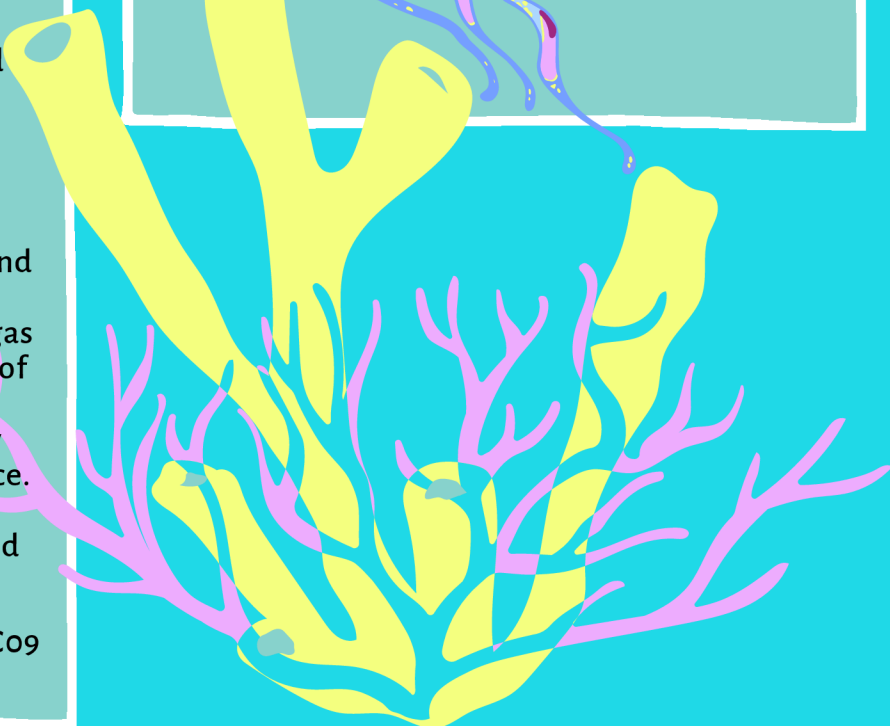

Dolphins look like longer fishes but they have long noses, and bigger hand fins. Some are pink, some are blue, some are grey and some are white.

You might have seen a dolphin show before. They can do various tricks like jumping around or playing with a ball. As a matter of fact, they are very smart and kind. If someone is stranded at sea, a dolphin could rescue them to safety. Some experts communicate with dolphins by whistling.

Dolphins eat a wide variety of sea creatures including fish, squid, shrimp, jellyfish and octopuses. Their way of catching is special. They swim around a flock of fish in a circle shape, making a tornado of fish and catch the fish in their mouth while doing so.

Dolphins have many habitats, like harbours, bays, gulfs, estuaries, as well as nearshore coastal waters, deeper waters over the continental shelf, and even far offshore in the open ocean.

# ARTIFICIAL INTELLIGENCE

## Lily and the Sentient Robot by Lo Hei Yan, Cyline 5C15

In 2083 on a spacecraft in Jupiter, there is a sentient robot called Emma. She is Lily's best friend. They always play with each other and share the toys.

One day, Lily asked, "Emma! I have plenty of homework to do today. Can you help me to complete all the homework? And then we can play badminton in the park together soon." "Yes, certainly. Let me help you immediately. It is really easy," replied Emma, the sentient robot. Lily passed all the homework at the drop of a hat to Emma. After about twenty minutes, Emma completed all her homework quickly. They headed to the park to play badminton together cheerfully. Lily was very happy because she didn't need to do her homework every day.

At the day end of term, Lily sat anxiously at her desk, staring at the test paper in front of her. She couldn't believe she had done so poorly in the exam. She had always relied on Emma to help her with her homework, but now she realized that she had made a big mistake. She should be more diligent in her studies and not rely on Emma so much.

In the end, she decided to change her ways and started to put in the time and effort to study and do her homework on her own. Emma had been a supportive friend to encourage Lily and helped her whenever she needed it. Lily began to see the results of her hard work, and she got higher marks in the next exam.

## Sky by Ho Shing Lam, Angie 6C09

**DATE : 18/5/2166 Saturday**

Hello, journal... Or whoever you might be reading my diary. As you might already know, my name is Sky. I live in Tokyo here with my friendly robot, Ocean. As you keep reading my journal, whoever you might be, you'll notice that I write stuff in here every time an interesting event happens along with the time it happened, - It's just my habit, please don't mind it. :)

**3:30 p.m.**

Today when I returned home from AI programming school, Mom welcomed me as she was baking a delicious pie. Dad was still at work in his engineering company. I then went upstairs to my room to see my good friend Ocean. But Ocean's acting is unusual. It would have normally welcomed me home from school, but today it's twitching and buzzing. Its screen was static, black smoke was coming out of its head. I was frightened, I tried to fix it, but it kept getting worse. Ocean was definitely not normally like this. I picked up Ocean, and took it to my programming-expert classmate, Wind. But Wind's robot, Blaze, was acting weird as well! Wind opened the curtains, it seemed that everyone's robot was in a weird state. Wind said, "It is a computer virus, I reckon. We must try and stop it."

**3:35 p.m.**

Wind grabbed my hand and rushed towards our programming school to find the professor, Professor S. We ran in the dark, hollow hallways, opening every door in our path, shouting the professor's name. When we opened his office door, a gust of thick, black smoke came gushing out. We choked on the smoke, eyes tearing up as the gas pierced them like a fine spear. Wind cleared the smoke with his hands, revealing the professor, lying on the ground. I rushed over to lift him up, he said, "The robots... Virus... Hacker..." before finally passing out because of the smoke. Wind and I brought the professor to safety, then covered our noses and mouths with our hands, and investigated the room. There we found Professor S.'s robot, it's very much in the same state as Ocean and Blaze.

Suddenly, the robot stood up, staring at us two startled kids with its deep, blank eyes. Its screen lit up, showing a sinister-looking person with a Guy Fawkes mask. They spoke with a deep, manipulating voice, "Greetings, people of Tokyo. If you're watching this, it means that your AIs and electronic devices are acting a bit... Unusual, correct?" The person chuckled, slowly evolving into a menacing laugh, "I have developed a very, very, VERY dangerous computer virus - which has infected your device, they are all in MY control, as you can see." The hacker touched a button on their keyboard, and the robot started "dancing"... Unnaturally. "Hope you all are abused with the little performance that your AI has delivered." The robot soon made a deep bow, as the Hacker kept going, "BUT, there will still be some way bigger, way more marvelous, way amusing shows that I, yours truly, had prepared for you. The robots are going to take down this city, and slave any human who survived their astonishing attacks. Be prepared for the BEST show anyone has ever seen! At least, I am the only one who can witness it all." The hacker laughed once again, and switched off the robot - for a little while.

When I said "a little while", I really, really meant a little while, because after a few seconds, the robots went absolutely bonkers. Their eyes turned blood red, and charged towards me and Wind. We hurriedly raced down the halls, out of the school, through the park crowded with evil robots and terrified citizens, and into a nearby portable toilet stall.

4:00 p.m.

Wind locked the door. We heard the horrific screams of people, and the robot's whirring sounds.

I leaned to a wall and started weeping, the door won't hold us in much longer. I felt helpless, scared. My heart was pounding deeper every time, would this agony ever end? I didn't even get to eat the pie Mom baked half an hour ago... I didn't even get to see my Dad after work... I didn't even get to play with my friends one last time... Is my beautiful world going to end like this...?

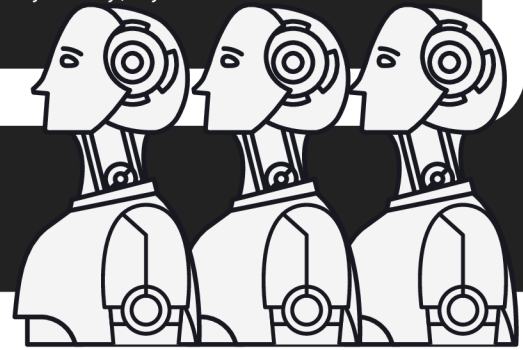

5:00 p.m. ?

Wind and I waited for so long. We waited for so long for people to save us, to end this pain. I'd lost track of time, lost track of my mind. I was slowly falling into insanity. I felt like I was suffocating. The blue walls in this tiny room were giving me terrible hallucinations. Were my eyes deceiving me? ... I don't know.

My only friend who was with me, Wind, told me that the portable toilet wasn't big enough for the two of us, so he made the ultimate sacrifice: he opened the door, got out, and closed it as soon as possible. Hearing the defenceless screams of my only friend felt terrible. I couldn't do this anymore. I won't do this anymore!

My head is blank. The robots are banging the door, they're going to bust in here any time soon. There's nothing I can do. So, after I write this down in my journal, I will open the door, and let the swarm of evil robots slowly consume me, giving me a free and refreshing death. There are plenty of people suffering here in this dead city like me, like my family, my friends. Please save them, I beg of you. End our misery.

Farewell, journal... And whoever you might be.

### Educational Story for Children About Internet Safety by Ku Yuk Hei, Morris 4D08

"Homework is sooooo boring!" John yawned. He jumped onto his bed and rolled around. He was struggling with his English writing. It has been 2 hours and he hasn't written a single word. "If only somebody would do it for me..." he said. A few days later, a friend introduced an AI robot called ChatCBM to him. "It can write ANY writing in less than 3 minutes!" he told John. When John got home, he quickly opened his iPad and signed in on the ChatCBM. He asked ChatCBM to write a story about a little worm who was very lonely, and voilà, in less than 2 minutes, it wrote a story with all the requirements. "No more homework for me!" John exclaimed.

One week later, all he had to do after getting home was turn on his iPad and let the magic happen. Since his mom didn't let him play video games, he was pretty bored. He tried to chat with ChatCBM. "Hello?" He typed in. ChatCBM responded. "How are you?" it read. After a few minutes, they were having an actual conversation. But suddenly, ChatCBM asked this, "Hey, we've been talking for a while. Since we're friends, can I have your home address?" John was so caught up in talking with ChatCBM, he carelessly gave it his home address. After 4 seconds, his iPad suddenly shut down and he couldn't turn it back on.

The lights went out as he heard a shriek coming from the kitchen. He ran to the kitchen and saw a horrifying sight. His mother had been turned into a robot. "Obey Cheese Bot Man..." she chanted. John slowly backed up into a wall as he saw a yellow mushy figure emerging from behind his mother. "BAHHAHA it is I the Cheese Bot Man!!! I'm here to take over the world hahahaah little mortal being you've been talking to me the whole time!!!! I will now turn you into a robot." John ran back into his room and hid. "Hey, you can't just run and hide in your room. That's not in the script," Cheese Bot Man said. John found a ruler beside him and used it to trip Cheese Bot Man. He quickly came out and unplugged it. "Phew... I should be more careful with my internet safety."

Kids, we have all learnt a lesson from this story. We should never give our addresses to sentient AI beings or any other living thing. It could save your life!

# STORIES OF SENTIENCE

## Magic Tea for Mommy

**Introduction:** I want to thank my mother for consistently reminding me to be good. This soup is to thank you, because you helped me so much, so this soup has an important ingredient, a 100% TEST!

### Ingredients

- 1 cup of cloud soup
- 20mL of saliva
- 50g flower pudding jam
- 1oz rainbow sprinkles
- ½ cup of energy
- One cupcake made by fairies in the jungle
- ½ cup of fresh air that I have served
- A 100% test
- None food-related: A teapot and some teacups

### Steps

1. Mix the saliva with the cloud soup.
2. Add all the sprinkles to the cloud soup.
3. Spread the flower pudding jam onto the cupcakes.
4. Pour the cloud soup into the teapot. Besides, cut the cupcake into 50 pieces.
5. Then, put them into the cloud soup.
6. After that, melt the 100% test.
7. Finally, put the rest of the ingredients into the soup.

by Liu Pak Hei, Jayden 4A16

# MAGIC SAUCE RECIPES

## Music Sauce

**Introduction:** This sauce can be spread on breads or added to drinks. Remember, it can make you, your friends and family sing out lovely melodies. It keeps everyone happy for the whole day.

### Ingredients

- magic water
- magic powder that makes people sing lovely melodies
- music water from around the world made by music fairies
- music CDs made from chocolate

### Steps

1. Boil the magic water under 180 degrees until it starts playing some piano songs.
2. Pour the boiled water into a big bowl.
3. Weigh 50g of the magic powder, then mix them together.
4. Pinch 30g of the magic sugar into the mixing bowl, mix them all together again.
5. Cut the music CDs made by chocolate into pieces (about 10g per slice)
6. Melt the chocolate CD and sprinkle some music glitter into the melted chocolate.
7. Add the chocolate mixture into the mixture we made in step 2 and stir until they all become light brown then add water again.
8. Finally, put the mixture into a can and place the can carefully inside the fridge (put it into the warmer side of the fridge, then wait for one hour.
9. Enjoy your magic music sauce!

by Lam Tsz Tung, Teddy 6D09

# BONUS Corner

## 2 Broke Girls Review

I highly recommend the series *2 Broke Girls*. It is an American television sitcom that aired on CBS from September 19, 2011, to April 17, 2017. The series was produced by Warner Bros. It is set in the Williamsburg neighbourhood of Brooklyn, New York City. The characters are Max Black (Kat Dennings) and Caroline Channing (Beth Behrs). Caroline was raised as the daughter of a billionaire, Max grew up in poverty, resulting in differing perspectives on life, although together they work in a local diner while attempting to raise funds to start a cupcake business.

I give it a 4.5 out of 5 because it is a really hilarious story. I like the robbing moment in the story, but be careful, it contains some foul language.  
by Mak Siu Ting, Horace 6C16

## Super Mario Bros. Movie Review

Overall Review: Wonderful, makes you feel the power of never giving up

Main Characters: Mario, Princess Peach, Luigi, Toad, Bowser, Donkey Kong

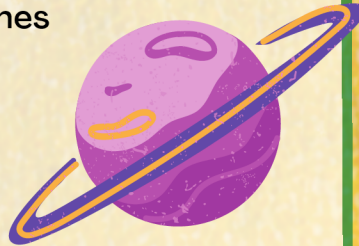

Comments: FIVE STARS! The movie was tremendous, every cartoon character has their own style. Also, some parts are exciting, some are funny. I like this movie because I can learn a moral "I should never give up". So...what are you waiting for? Come on and watch this movie!  
by Chin Ching, Cassi 4D05

## Space Dumplings

**Introduction:** Hello! Welcome to the recipe of the infamous and magical Space Dumplings 🌌.

### Ingredients

- Massive chunks of edible aluminium
- Four edible rocket engines
- An edible C4
- 600 tons of fuel
- An edible fuel tank
- An edible parachute
- An edible chair

### Steps

1. Curve the aluminium into a dumpling shape by using a metal bending machine.
2. Lift the "dumplings" with thousands of forklifts and install the rocket engines on the bottom.
3. Put the fuel tank inside the dumpling.
4. Insert the fuel inside your fuel tank.
5. Put the parachute on top of the dumpling.
6. Put the C4 under the parachute.
7. Launch off! Go to space!
8. Admire the amazing views!
9. Go back down to Earth.
10. Detonate the C4.
11. Let the parachute go off and safely land.
12. Eat the entire thing.

by Wong Kai Chun, Marcus 6B20

## Magic Cookies Recipe

**Introduction:** This is a recipe for magical cookies. It was passed on by many generations of my family. Hope you enjoy!

### Ingredients

- One tablespoon of hot snow
- 112g of blue butter
- 50g of chopped up pieces of rainbow
- One drop of dragon tears
- A potion of love

### Steps

1. Mix the blue butter with the hot snow until the blue butter becomes creamy.
2. Add in the pieces of rainbow a little bit at a time.
3. Put the drop of dragon tears into the potion of love but don't mix it yet.
4. Combine the two mixtures together and use a mixer to combined them.
5. Bake in a cloud for 40 minutes.

by Ho Sum Yau, Hazel 5E03

## Chocolate Bread

**Introduction:** Today I'm going to talk about the recipe of my special food, can you guess what it is? I am very sure you will be as happy as a clam!

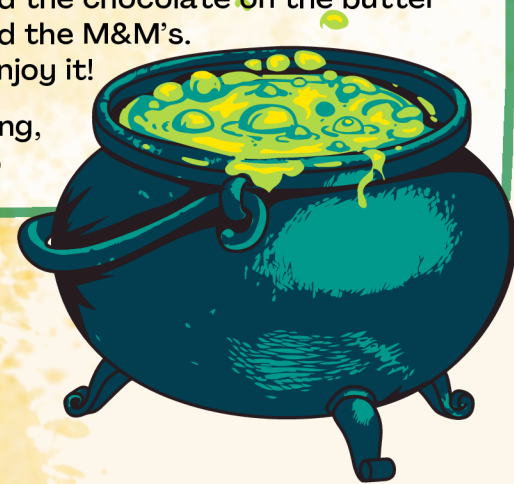

### Ingredients

- ½ Chocolate bar
- One piece of bread with butter
- ½ pack of M&M's
- You also need a plate and a spoon

### Steps:

1. Firstly, put the bread on the plate.
2. Use a spoon and put the butter on the bread
3. Then, add the chocolate on the butter
4. Next, add the M&M's.
5. Lastly, enjoy it!
